

Roadmap to the Fusion Economy

PROPELLING FUSION TO THE GRID

SOON ENOUGH TO MAKE A DIFFERENCE

Why Fusion

- Inherently safe scalable unlimited power source
- Zero-carbon
- A clean energy solution with potential capacity to supply the world's needs while fitting into the current electrical grid
- A critical power complement to other renewable sources

Why Now

- Recent breakthroughs pave the way for demonstration of technical feasibility in less than 10 years
- Advances in computation and simulation, artificial intelligence, materials, and manufacturing
- > 25 commercial start-up companies plus US National Labs and academia
- Public, private, and philanthropic funding and partnerships

Roadmap to the Workshop

- Panelists include leaders in technology, finance, government and philanthropy
- Public, private, and non-profit sectors
- Imagine the potential impact of fusion on
 - Economic development
 - Regional planning
 - Insurance sector
 - Wall Street
 - Investment opportunities
